

# IP Command™

## *IPT Connect DATASHEET*

THE HIGH-CAPACITY MOBILE APPLICATION FOR DISPATCH COMMUNICATIONS

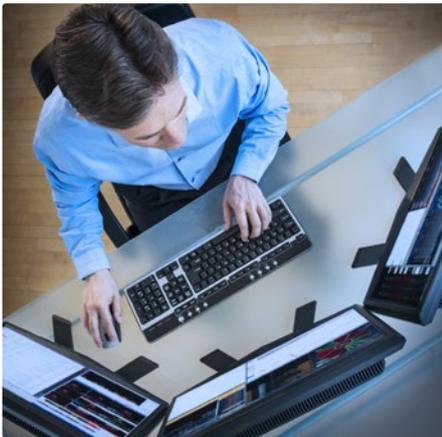

A part of **BT** 

### **Solution Overview**

IPT Connect provides dispatchers with a portable, high-capacity communications application that can run on smartphones, tablets or PC's using an HTML 5 compatible browser. The software application runs virtually on any device and enables the user to easily visualize and prioritize multiple streams of telephony communications and radio from anywhere and to monitor and participate in full duplex conversations when being off the dispatch center.

The software solution requires also 2 telephony capable devices that it pilots to provide one handset and 5 speaker channels capability. Typically softphones installed on the same device or wired or wireless phones can be used to be called back by the central system of the command room.

## KEY CAPABILITIES

One-Touch access to multiple telephony channels

Simple, cost-effective soft client application that runs on any HTML 5 capable device

Extends complex dispatcher voice communications to mobile and remote users

Line-sharing, barge-in, multi-level conferencing capability

Compliance through central in-house voice recording

IPT Connect offers a concentrated set of key dispatching capabilities including access to telephony and dispatcher voice, multiple line appearances, rollover/pickup groups, call queues, barge-in and the ability to participate in multiparty ad hoc conferences with the command and control room. IPT Connect monitors up to five channels simultaneously.

The IPT Connect application addresses key business requirements including: simple, inexpensive licensing, massive scalability, rapid deployment, survivability and disaster recovery, security policy, communications with command rooms or back office personnel as long as integration with unified communications, voice recording platforms and applications.
