

IP Command™

MOBILE COMMANDER DATASHEET *For Android Devices*

THE HIGH-CAPACITY MOBILE APPLICATION FOR DISPATCH COMMUNICATIONS

A part of **BT** 

Solution Overview

The IP Command Mobile commander application untethers dispatchers from their desk by extending their lines, speed dials, speakers and intercom on Android tablets and mobile phones. Mobile Commander is ideal for mobile employees, field staff who need to be involved in the dispatching workflow, as well as for business continuity/disaster recovery.

Mobile Commander offers easy access to most functions through a touch-screen interface that can be configured to meet the users' needs and preferences. Key dispatching requirements such as open line dealing, multiple-call monitoring, group intercom, group call visibility, line-sharing and others are available. And because all communications are through the enterprise unified communications infrastructure, lines can be shared and calls can be recorded and archived just as if they occurred in the office.

Mobile Commander runs on the same IP Command application environment as the dispatch console, making it simple to deploy, integrate and maintain with all dispatcher voice and enterprise UC elements.

Each Mobile Commander application can display a large number of buttons per page with access to additional lines, speed dials and contacts via pagination. The touch screen UI enables one-touch access to lines, speed dials, speaker and intercom channels.

The application can be deployed on any tablet or mobile phone device running Android O/S. Lines and channels can be shared with colleagues for conferencing, barge-in, individual and group speed dial directories. Unique profiles and calling/-contact schemes can be programmed for specific situations like multiple dispatching shifts or key market events.

KEY CAPABILITIES

Mobile Command Soft Client
Native SIP Signaling
Access to DID, ARD, MRD, Hoots, Intercom
Line-sharing, Barge-in, Conferencing capability
Up to 5 simultaneous calls
Voice Recording Compliance
Common lamping with command room
Collaboration Application Integration

SOLUTION HIGHLIGHTS

Single Platform	Mobile Commander runs on the same IP Command application environment as the dispatch console, making it simple to deploy, integrate and maintain with all dispatcher voice and enterprise UC elements
Capacity	Each Mobile Commander application can display a large number of buttons per page (depending of the android device) with access to additional lines, speed dials and contacts via pagination
Ergonomics	The touch screen UI enables one-touch access to lines, speed dials, speaker and intercom channels
Flexibility	The application can be deployed on any tablet or mobile phone device running Android O/S Lines and channels can be shared with colleagues for conferencing, barge-in, individual and group
Collaboration	speed dial directories
Customization	Unique profiles and calling/contact schemes can be programmed for specific situations like multiple dispatching shifts or specific events
